

Western Regional Emergency Medical Advisory Committee

Title: Rapid Sequence Induction (RSI)	Policy # 1998-2
--	------------------------

Effective Date:	10/1998								
Reviewed:									
Updated:	06/2009	01/2018							

Policy:	Credentialed providers must complete an initial education program that includes both cognitive and psychomotor content that is approved by the service medical director. Credentialed providers must maintain credentialing by completing a periodic cognitive and skills evaluation approved by the service medical director.
Procedure:	Agencies with providers authorized to perform RSI must maintain a record of the training program used, attendance sheet, and medical director conducting the program. They must also keep and maintain signed records verifying the initial and periodic credentialing processes.
