OLD BUSINESS	<ol style="list-style-type: none"> 1. Collaborative Protocols – Todd Reisner was asked by Dr. Walters to put together a side by side spreadsheet outlining the changes and additions for each level between our current protocols and the Collaborative. There are some updates to our current policies that need to be done prior to switching to the Collaborative protocols. A list will be compiled by Dr. Clemency and presented at the November meeting. 2. The providers giving Medical Direction need to be trained on the changes between the two protocols. If you are interested in working as part of this group to figure out how this should be done please contact Karen or Dr. Walters. 3. BLS – 12-Lead Policy – A draft was disseminated to the WREMAC members prior to the meeting for review. There was a motion passed to accept the policy as Notification only with changes voted on by the WREMAC members. 4. AEMT-CC – The discussion regarding this level and what to do moving forward has been table until after the next State Council meeting in January. 5. E-PCR’s- a committee meet to discuss the requiring all ALS Agencies to move to e-PCR’s at this time it is not going to be mandated but strongly encouraged. There is a lot of useful data gathered by using e-PCR’s and one day it will be required. 	MOTION 16-27

2015-16 Motion Table – Western Regional Emergency Medical Advisory Committee

#	DATE	MOTION	MADE BY	SECOND	ABSTAIN	NAY	APPROVED
15-01	1/21/2015	Motion to accept the September 17, 2014 meeting minutes	Dr. Bart	Dr. Lynch			
15-02	1/21/2015	<p>Motion to make changes to the following changes to the WREMAC protocols:</p> <p><u>Medical: ALLERGIC REACTION / ANAPHYLAXIS Protocol</u>- This would allow AEMT's to administer epinephrine to adult patients by drawing up the medication and administering it IM, rather than just allowing auto-injector use. This skill was moved from the CC to the AEMT level in the proposed changes and is consistent with AEMT protocols currently in use in the Central New York EMS Protocols.</p> <p><u>Procedure: AIRWAY MANAGEMENT Protocol</u>- Adds surgical airways for paramedics credentialed by their medical director, this is currently allowed in several protocols across NYS including the Collaborative Protocols.</p> <p><u>CPAP Changes</u> - In anticipation of final approval of a statewide BLS CPAP protocol, the WREMAC CPAP protocol and other protocols that include CPAP have been amended to be more consistent with the proposed statewide protocol. Even when these changes are approved by the WREMAC, CPAP will only be approved for use at the BLS level when the Bureau of EMS officially approves and implements these changes, and when an agency is credentialed to do so by their medical director. The following protocols have been revised: Procedure: AIRWAY MANAGEMENT, Procedure:</p>	Dr. Kenyon	Dr. Bart			X
			Dr. Walters	Dr. Faulk	Dr. Bart		X
			Dr. Walters	Dr. Bart			X

		<p>discrepancies were clarified to differentiate dosing based on route of administration as well as maximum doses to not exceed current adult protocols. The midazolam doses are also standardized between both pediatric protocols for consistency.</p> <p><u>Intranasal Administration</u> - As intranasal atomizers have become a routinely stocked item on many ambulances due to the NYS BLS intranasal naloxone policy, this route of medication administration is a viable option for many agencies. The accompanying protocol revisions now specifically mention the intranasal route for all adult and pediatric protocols that include fentanyl, midazolam, and glucagon. Under the current protocols IN was listed for these medications in some, but not all the protocols. These three medications along with naloxone are the most commonly administered medications given intranasally with good data supporting their absorption, clinical efficacy, and safety. This will specifically allow for more rapid medication administration when an IV is not immediately available.</p> <p><u>Medical: SEIZURES Protocol</u> - The wording of midazolam dose was reworded to be more consistent with other protocols, however, the dose remains the same.</p>	Dr. Teuscher	Dr. McGee			X
